Thank you for allowing us to care for your lawn this year, our 28th year in business. Since we are entering into the end of the season, we are evaluating the effect of summer on the lawns and landscapes in the area. Our winter was relatively mild, and snowfall totals were down. The spring and early summer had above average rainfall, so lawns and landscapes recovered and grew well. July and August saw above average temperatures, coupled with a major deficit in rain causing lawns to go into drought stress. Efforts to mow high and water when dry are the two most important things homeowners can do to protect their investment, along with a regular fertilization schedule (fertilization helps to thicken the lawn which is a natural barrier against weeds and diseases) and aerating and seeding when necessary. Once again, we are thinking of the forthcoming season. Since we don't assume services from one year to the next, we are passing this confirmation letter along as a convenience to you. Please fill out this form and send it in to us if you would like us to continue servicing your property. Just let us know if there will be any changes to your program. ***Please include a current phone number, it is difficult to contact people without one. If the season starts and you don't hear from us please call with any updates.***
